

Pre-delivery inspections for used fire rescue trucks

Independent 3rd party inspection by German engineers

If you are going to purchase used fire rescue trucks, concrete mixer trucks or other kind of haulers there is always a risk. These trucks are sometimes working in tough conditions and sometimes standing on the same place for months. We have seen recently many costly problems on such trucks. Small repair such as worn brake or a broken gauge can sum up to several hundred Euros. But if the sprayer is broken or the water pump does not work the repairs can easily extend to some thousand dollars. Therefore we recommend strongly an unbiased and independent inspection on used fire trucks or any other fire rescue equipment.

MEVAS is performing inspections on used concrete pumps, used fire rescue trucks, mixer trucks of various brands. So far we have done pre-delivery inspections on fire trucks mounted on Mercedes, Scania and MAN trucks.

- **Concrete Pump Inspection**
- **Concrete Mixer Truck Inspection**
- **Used Truck Inspection**
- **Tractor Head Inspections**
